

VIRTUAL WALL™

Ultimate Energy Efficiency by Combining
Best-In-Class HVAC Technologies

VIRTUAL WALL™ controller provides a solution for managing your facility by integrating HVAC systems into a single access point

- Reduce energy consumption and control your facility's environment with an easy-to-use control and premiere HVAC equipment
- Control flexibility allows the facility manager to adjust settings or monitor the system anytime/anywhere through a simple touch screen, smart device or PC
- A custom HVAC solution provided by one supplier with the expertise to help you update your existing facility, or compliment a new one

A building management system for total control of a facility's HVAC system

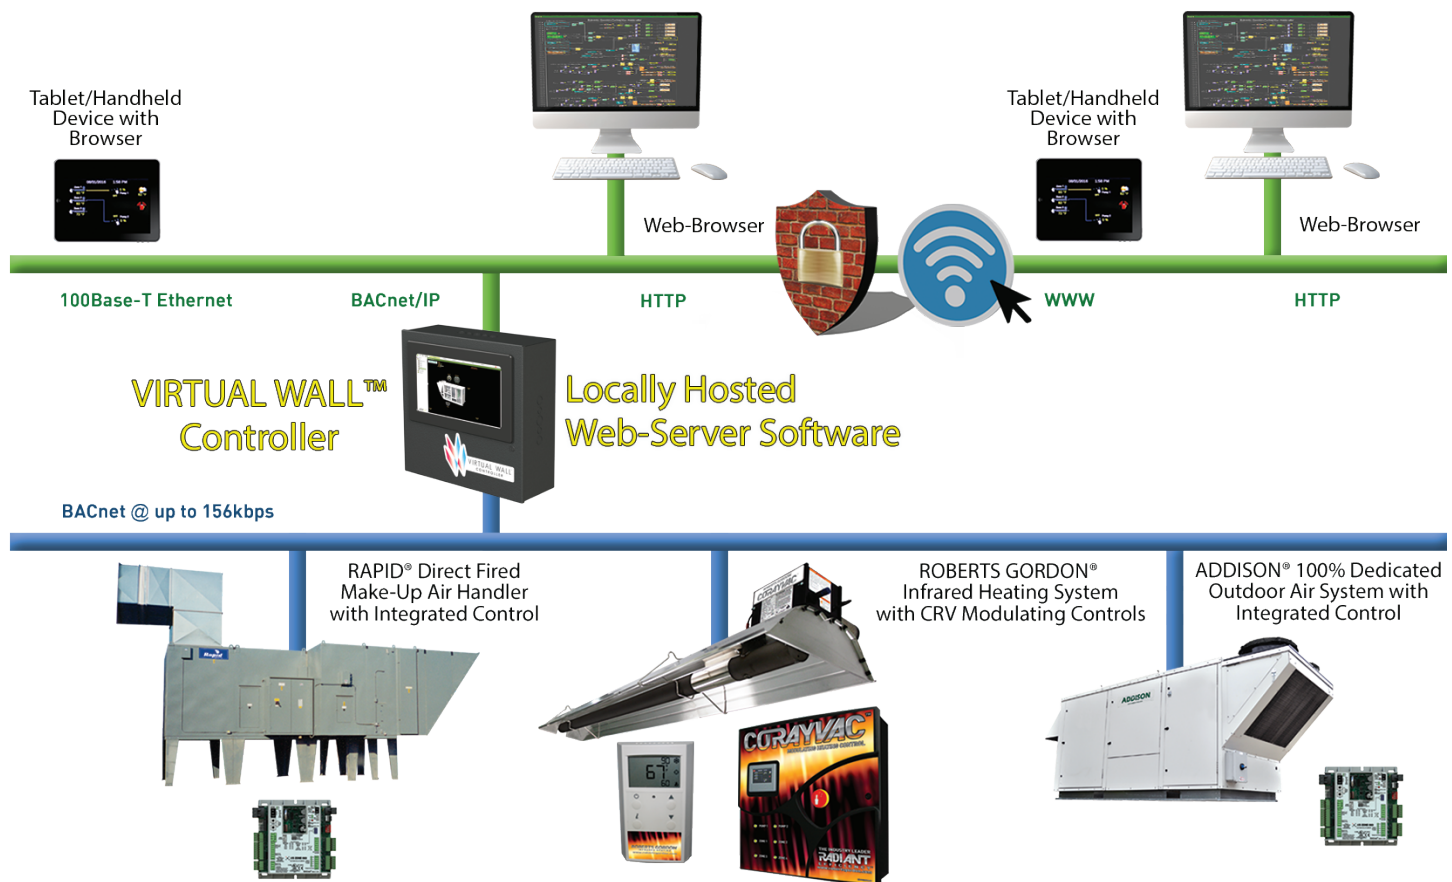

- Intuitive graphical user interface showing equipment status in real time while providing access to zone temperatures throughout the facility allowing users to adjust accordingly
- Adjust set points and other control properties through advanced scheduling during occupied and unoccupied modes
- Uses open protocol allowing communication over the internet or intranet without special software or plug-ins
- Flexible trending provides users with historical operation data to review building conditions

Customization, Optimization, Integration Made Simple
